Classwork Day 24: Understanding the Titanic data

Group member names:

All questions refer to the training dataset (train.csv).
1) How many passengers are there?

2) How many of the passengers are male? Female? Unknown?

3) What is the probability that a passenger survived?

4) What is the probability that a child (12 years or younger) passenger survived?

5) What does the histogram of passenger ages look like?

6) What does the histogram of surviving passenger ages look like?

7) On the back, tell me something interesting you found about the data.
