## Homework Assignment (Due date Sunday August $4^{\text {th }}$ 2019)

## Question 1

In this homework assignment, you will create tennis club database named "tennis" and write SQL statements to create database tables, load data to the tables, and run MySQL queries.

The tennis database consists of the following tables:

## PLAYERS, TEAMS, MATCHES, PENALTIES, COMMITTEE_MEMBERS

The tennis club database schema is shown in the following Figure.

A double-headed arrow at the side of a column (or combination of columns) indicates the primary key of each table based on our UoD (Universe of Discourse).

- PLAYERNO of PLAYERS
- TEAMNO of TEAMS
- MATCHNO of MATCHES
- PAYMENTNO of PENALTIES
- PLAYERNO plus BEGIN_DATE of COMMITTEE_MEMBERS

There are several foreign keys as you can see from the schema diagram, but we do not consider referential integrity constraints for creating database tables for this assignment. In the next assignment, we will study how to create database and populate database tables with foreign key constraints.

The columns in each of the tables are described below.

## PLAYERS table

PLAYERNO Unique player number assigned by the club.

| NAME | Surname of the player, without initials. |
| :---: | :---: |
| INITIALS | Initials of the player. No full stops or spaces are used. |
| BIRTH_DATE | Date on which the player was born. |
| SEX | Sex of the player: M(ale) or $F$ (emale). |
| JOINED | Year in which the player joined the club. This value cannot be smaller than 1970, the year in which the club was founded. |
| STREET | Name of the street on which the player lives. |
| HOUSENO | Number of the house. |
| POSTCODE | Post code. |
| TOWN | Town or city in which the player lives. We assume in this example that place names are unique for town or cities or, in other words, there can never be two towns with the same name. |
| PHONENO | Area code followed by a hyphen and then the subscriber's number. |
| LEAGUENO | League number assigned by the league; a league number is unique. |

## TEAMS table

TEAMNO
PLAYERNO

DIVISION
Unique team number assigned by the club.
Player number of the player who captains the team. In principle, a player may captain several teams.

Division in which the league has placed the team.

## MATCHES table

| MATCHNO | Unique match number assigned by the club |
| :--- | :--- |
| TEAMNO | Number of the team |
| PLAYERNO | Number of the player |
| WON | Number of sets that the player won in the match |
| LOST | Number of sets that the player lost in the match |

## PENALTIES table

| PAYMENTNO | Unique number for each penalty the club has paid. This number <br> is assigned by the club. |
| :--- | :--- |
| PLAYERNO | Number of the player who has incurred the penalty. |
| PAYMENT_DATE | Date on which the penalty was paid. The year of this date <br> should not be earlier than $1970, ~ t h e ~ y e a r ~ i n ~ w h i c h ~ t h e ~ c l u b ~$ |

was founded.
Amount in dollars incurred for the penalty.

## COMMITTEE MEMBERS table

| PLAYERNO | The number of the player. |
| :--- | :--- |
| BEGIN_DATE | Date on which the player became an active member of the <br> committee. This date should not be earlier than January 1, |
| 1990, because this is the date on which the club started to <br> record this data. |  |
| END_DATE | Date on which the player resigned his position in the <br> committee. This date should not be earlier than <br> the BEGIN_DATE but can be absent. |
| POSITION | Name of the position. |

The current database state (data populated) is shown below.

The PLAYERS table:

| PLAYERNO | NAME | INIT | BIRTH_DATE | SEX | JOINED | STR |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2 | Everett | R | 1948-09-01 | M | 1975 | Ston | y R |
| 6 | Parmenter | R | 1964-06-25 | M | 1977 | Hase | ltine |
| 7 | Wise | GWS | 1963-05-11 | M | 1981 | Edge | combe |
| 8 | Newcastle | B | 1962-07-08 | F | 1980 | Stat | ion R |
| 27 | Collins | DD | 1964-12-28 | F | 1983 | Long | Driv |
| 28 | Collins | C | 1963-06-22 | F | 1983 | Old | Main |
| 39 | Bishop | D | 1956-10-29 | M | 1980 | Eato | n Squ |
| 44 | Baker | E | 1963-01-09 | M | 1980 | Lewi | s Str |
| 57 | Brown | M | 1971-08-17 | M | 1985 | Edge | combe |
| 83 | Hope | PK | 1956-11-11 | M | 1982 | Magd | alene |
| 95 | Miller | P | 1963-05-14 | M | 1972 | High | Stre |
| 100 | Parmenter | P | 1963-02-28 | M | 1979 | Hase | ltine |
| 104 | Moorman | D | 1970-05-10 | F | 1984 | Stou | Str |
| 112 | Bailey | IP | 1963-10-01 | F | 1984 | Vixe | R Roa |
| The PLAYERS table (continued) : |  |  |  |  |  |  |  |
| PLAYERNO | HOUSEN | NO PO | STCODE TOWN |  | PHONEN |  | LEAG |
| 2 | 43 |  | 75 NH Strat | tford | 070-237 | 37893 | 2411 |
| 6 | 80 |  | 34 KK Strat | tford | 070-47 | 76537 | 8467 |
| 7 | 39 |  | 58VB Strat | tford | 070-34 | 47689 | ? |
| 8 | 4 |  | 84 RO Ingle | ewood | - 070-45 | 58458 | 2983 |
| 27 | . 804 |  | 57DK Eltham |  | 079-23 | 34857 | 2513 |
| 28 | 10 |  | 94 QK Midhu | urst | 071-65 | 59599 | ? |
| 39 | 78 |  | 29CD Strat | tford | d 070-39 | 93435 | ? |
| 44 | 23 |  | 44 LJ Ingle | ewood | 070-36 | 68753 | 1124 |
| 57 | . 16 |  | 77CB Strat | tford | 070-473 | 73458 | 6409 |
| 83 | . 16A |  | 12UP Strat | tford | d 070-35 | 53548 | 1608 |

| 95 | $\ldots$ | $33 A$ | 57460 P | Douglas | $070-867564$ | $?$ |
| ---: | :--- | :--- | :--- | :--- | :--- | :--- |
| 100 | $\ldots$ | 80 | 1234 KK | Stratford | $070-494593$ | 6524 |
| 104 | $\ldots$ | 65 | 9437 AO | Eltham | $079-987571$ | 7060 |
| 112 | $\ldots$ | 8 | 6392 LK | Plymouth | $010-548745$ | 1319 |

The TEAMS table:
TEAMNO PLAYERNO DIVISION

| ------ | -------- | -------- |
| ---: | ---: | :--- |
| 1 | 6 | first |
| 2 | 27 | second |

The MATCHES table:

| MATCHNO | TEAMNO | PLAYERNO | WON | LOST |
| :---: | :---: | :---: | :---: | :---: |
| 1 | 1 | 6 | 3 | 1 |
| 2 | 1 | 6 | 2 | 3 |
| 3 | 1 | 6 | 3 | 0 |
| 4 | 1 | 44 | 3 | 2 |
| 5 | 1 | 83 | 0 | 3 |
| 6 | 1 | 2 | 1 | 3 |
| 7 | 1 | 57 | 3 | 0 |
| 8 | 1 | 8 | 0 | 3 |
| 9 | 2 | 27 | 3 | 2 |
| 10 | 2 | 104 | 3 | 2 |
| 11 | 2 | 112 | 2 | 3 |
| 12 | 2 | 112 | 1 | 3 |
| 13 | 2 | 8 | 0 | 3 |

The PENALTIES table:

| PAYMENTNO | PLAYERNO | PAYMENT_DATE | AMOUNT |
| ---: | ---: | :--- | ---: |
| -------- | ------- | ----------- | ------ |
| 1 | 6 | $1980-12-08$ | 100.00 |
| 2 | 44 | $1981-05-05$ | 75.00 |
| 3 | 27 | $1983-09-10$ | 100.00 |
| 4 | 104 | $1984-12-08$ | 50.00 |
| 5 | 44 | $1980-12-08$ | 25.00 |
| 6 | 8 | $1980-12-08$ | 25.00 |
| 7 | 44 | $1982-12-30$ | 30.00 |
| 8 | 27 | $1984-11-12$ | 75.00 |

The COMMITTEE_MEMBERS table:

| PLAYERNO | BEGIN_DATE | END_DATE | POSITION |
| ---: | :--- | :--- | :--- |
| ------- | --------- | ---------- | ------- |
| 2 | $1990-01-01$ | $1992-12-31$ | Chairman |
| 2 | $1994-01-01$ | $?$ | Member |
| 6 | $1990-01-01$ | $1990-12-31$ | Secretary |
| 6 | $1991-01-01$ | $1992-12-31$ | Member |

| 6 | $1992-01-01$ | $1993-12-31$ | Treasurer |
| ---: | :--- | :--- | :--- |
| 6 | $1993-01-01$ | $?$ | Chairman |
| 8 | $1990-01-01$ | $1990-12-31$ | Treasurer |
| 8 | $1991-01-01$ | $1991-12-31$ | Secretary |
| 8 | $1993-01-01$ | $1993-12-31$ | Member |
| 8 | $1994-01-01$ | $?$ | Member |
| 27 | $1990-01-01$ | $1990-12-31$ | Member |
| 27 | $1991-01-01$ | $1991-12-31$ | Treasurer |
| 27 | $1993-01-01$ | $1993-12-31$ | Treasurer |
| 57 | $1992-01-01$ | $1992-12-31$ | Secretary |
| 95 | $1994-01-01$ | $?$ | Treasurer |
| 112 | $1992-01-01$ | $1992-12-31$ | Member |
| 112 | $1994-01-01$ | $?$ | Secretary |

Step 1: Write createTennisDB.sql which contains the following statements as shown below:

```
source players.sql /* to create players table */
source teams.sql /* to create teams table */
source matches.sql /* to create matches table */
source penalties.sql /* to create penalties table */
source committee_members.sql /* to create committee_members
table */
source load players.sql /* to import data to the table */
source load teams.sql /* to import data to the table */
source load matches.sql /* to import data to the table */
source load_penalties.sql/* to import data to the table */
source load_committee_members.sql /* to import data to the table
*/
```

In each SQL file for creating a table add "drop table if exists table_name" SQL statement to delete table if you created before.

Step 2: Make data files each of which contains the data to be populated in the target table. You need to have five data files: players.dat, teams.dat, matches.dat, penalties.dat, and committee_members.dat

For example, two CSV (comma separated value) data are in teams.dat file.
"1","6","first"
"2","27","second"
Data are imported to two rows in the teams table by load_teams.sql as shown below.

```
load teams.sql
LOAD DATA LOCAL INFILE "teams.dat"
INTO TABLE team
FIELDS ENCLOSED BY "\"" TERMINATED BY ","
;
```

After logging in to MySQL server, you will need to create new database "tennis" and select the database for use as shown below. If tennis database exists, delete the database to create a fresh new tennis database.

Let us assume your SQL and data files are in the folder /home/myDB (C:lhome\myDB).

```
$cd /home/myDB
$mysql --local-infile -u <username> -p
-----------
Mysql> drop database if exists tennis;
mysql> create database `tennis`;
/* you do not need to use back tick */
mysql> use tennis;
mysql> source createTennisDB.sql
//In Linux, you need to open MySQL command shell in
//order to bypass security problem caused by bulk loading using infile
//$mysql --local-infile -u accountName -p
//Passwd: enter password
//source source.sql
```

Step 3: Write SQL statements which perform the following tasks.

1. Get the numbers, names, and initials of all players whose name and initials are equal to that of the player 6 or of the player 27 .
2. Get all the different town names from the PLAYERS table.
3. For each town, find the number of players.
4. For each team, get the team number, the number of matches that has been played for that team, and the total number of sets won.
5. For each team that is captained by a player resident in "Eltham", get the team number and the number of matches that has been played for that team.
6. Get each different penalty amount, followed by the number of times that the amount occurs, in the PENALTIES table, and also show the result of that amount multiplied by the number.
7. Get the player number of each player whose last penalty was incurred in 1984.
8. For each player who has incurred more than $\$ 150$ worth of penalties in total, find the player number and the total amount of penalties.
9. For each match, get the player number, team number, and difference between the number of sets won and the number of sets lost; order the result in ascending order on the difference.
10. Get all the different town names from the PLAYERS table.
11. For each town, find the number of players. 3. For each team, get the team number, the number of matches that has been played for that team, and the total number of sets won.
12. For each team that is captained by a player resident in "Eltham", get the team number and the number of matches that has been played for that team.
13. Get each different penalty amount, followed by the number of times that the amount occurs, in the PENALTIES table, and also show the result of that amount multiplied by the number.
14. For each player who has ever incurred at least one penalty, get the player number, the name, and the total amount in penalties incurred.
15. Get the player number of each player whose last penalty was incurred in 1984.
16. For each player who has incurred more than $\$ 150$ worth of penalties in total, find the player number and the total amount of penalties.
17. For each player who is a captain and who has incurred more than $\$ 80$ worth of penalties in total, find the player number and the total amount of penalties.
18. Get the player number and the total amount of penalties for the player with the highest penalty total.
19. For each match, get the player number, team number, and difference between the number of sets won and the number of sets lost; order the result in ascending order on the difference.
20. Create a view that holds all town names from the PLAYERS table and show the virtual contents of this new view.
21. Create a view that holds the player numbers and league numbers of all players who have a league number, and show the virtual contents of this view

## [Q.2] Answer the following questions based on the relation (table) schema EMP_DEPT

## EMP_DEPT

(a) Explain insertion anomaly with an example
(b) Explain deletion anomaly with an example
(c) Explain update (modification) anomaly with an example

## [Q.2] Answer the following questions

(a) Consider the universal relation $\mathrm{R}=\{\mathrm{A}, \mathrm{B}, \mathrm{C}, \mathrm{D}, \mathrm{E}, \mathrm{F}, \mathrm{G}, \mathrm{H}, \mathrm{I}, \mathrm{J}\}$ and the set of functional dependencies $\mathrm{F}=\{\{\mathrm{A}, \mathrm{B}\} \rightarrow\{\mathrm{C}\},\{\mathrm{A}\} \rightarrow\{\mathrm{D}, \mathrm{E}\},\{\mathrm{B}\} \rightarrow\{\mathrm{F}\},\{\mathrm{F}\} \rightarrow\{\mathrm{G}, \mathrm{H}\},\{\mathrm{D}\} \rightarrow\{\mathrm{I}$, J\} \}.

1. Derive the key for R.
2. Decompose R into 2 NF , then 3 NF relations.
(b) Consider the universal relation $\mathrm{R}(\mathrm{A}, \mathrm{B}, \mathrm{C}, \mathrm{D}, \mathrm{E}, \mathrm{F}, \mathrm{G})$ and the set of functional dependencies A --> B, B --> \{A, C, E $\}, C$--> $\{B, F, D\}, F-->\{D, G\}$ Derive the key for R
(c) Consider the relation $R=\{A, B, C, D, E, F, G, H, I, J\}$ and the set of functional dependencies F as follows;
$\mathrm{F}=\{\mathrm{AB} \rightarrow \mathrm{C}, \mathrm{BD} \rightarrow \mathrm{EF}, \mathrm{AD} \rightarrow \mathrm{GH}, \mathrm{A} \rightarrow \mathrm{I}, \mathrm{H} \rightarrow \mathrm{J}\}$.
Find the key of relation R.
Question 3
Explain the difference between 3NF and BCNF
