1. True or False:
   (a) T In CSS, each property declaration ends with a semicolon.
   (b) F Only one font can be specified in any CSS rule.
   (c) T A font-family is a set of fonts that share a common characteristic.
   (d) F To change to a boldface font, you use the font-width property in CSS.
   (e) F Pseudoclasses must be defined in your HTML file to be used.
   (f) F If you mix 100% red, 100% green, and 100% blue, you will get black.
   (g) T The span element is used to style in-line elements.
   (h) F The div element is used to style in-line elements.
   (i) T Tables are defined in rows, using the <tr> element.
   (j) T The <th> element can designate either row or column headings.

2. Answer in two sentences or less the following:
   (a) What does the padding property do? Give an example.
   The padding property adds space around an element. For example, if you need additional space between an image and it’s border, you would use the padding property, padding 10px;
   (b) What does the margin property do? How does it differ from the padding property?
   The margin property also controls spacing around elements, but it affects the spacing outside the border, while the padding property controls the spacing inside the border.

3. For each of the following, identify whether it would be done in HTML or CSS:
   (a) HTML include an image
   (b) CSS change the border around an image
   (c) HTML organize a table
   (d) CSS change the background color of table entries
   (e) CSS change text width
4. Fill in the following table with the corresponding decimal or hexcode representation of the number. For partial credit, show your work.

<table>
<thead>
<tr>
<th>Decimal</th>
<th>Hexcode</th>
</tr>
</thead>
<tbody>
<tr>
<td>6</td>
<td>#6</td>
</tr>
<tr>
<td>3</td>
<td>#03</td>
</tr>
<tr>
<td>18</td>
<td>#12</td>
</tr>
<tr>
<td>176</td>
<td>#b0</td>
</tr>
<tr>
<td>238</td>
<td>#ee</td>
</tr>
</tbody>
</table>

18/16 = 1 remainder 2
#b0 = 16·#b = 16·11 = 176
#ee = 16·14 + 14 = 160+64+14 = 224+14=238

5. Change the following HTML file to be in XHTML. Circle all changes needed and write in the changes:

Insert the DOCTYPE line at the top of the file and change the HTML line:

```html
<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Strict//EN"
   "http://www.w3.org/TR/xhtml1/DTD/xhtml1-strict.dtd">
<html xmlns="http://www.w3.org/1999/xhtml" lang="en" xml:lang="en">
```

```html
<head>
    <title>myPod</title>
    <style type="text/css">
        body { background-color: #eaf3da; }
    </style>
</head>
<body>
    <p> <img src="logo/mypod.gif" alt="myPod Logo" /></p>
    <h1>Welcome to myPod</h1>
    <p>Welcome to the place to show off your iPod!</p>
    <h2>Seattle, Washington</h2>
    <p>Me and my iPod in Seattle! You can see rain clouds and the Space Needle.</p>
    <a href="html/seattle_med.html">
        <img src="thumbnails/seattle_med.jpg" alt="My iPod in Seattle, WA" /></a>
    <a href="html/seattle_shuffle.html">
        <img src="thumbnails/seattle_shuffle.jpg"
```
6. Be the browser with the following HTML and CSS files. Draw the page and indicate any style (color, borders, etc) on your page:

Here's the page:
7. Write a **complete** CSS style sheet that:

- uses a sans-serif font throughout the page,
- <h1> and <h2> headings have a bold serif font,
- paragraphs inside the div with id `options` have solid borders, and
- <h1> headings should have a gray dotted bottom border.

```css
body {
  font-family: sans-serif;
}

h1, h2 {
  font-family: serif;
  font-weight: bold;
}

body {
  font-family: sans-serif;
}

h1, h2 {
  font-family: serif;
  font-weight: bold;
}
```

8. Write the HTML code for the table with the following information: (No need to write any CSS rules or style sheets).

* RAND New York Sales Tax Rates reports sales tax rates for some counties & cities.*

<table>
<thead>
<tr>
<th>Area</th>
<th>Rate</th>
<th>Area</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>New York State–only</td>
<td>4.00</td>
<td>Albany</td>
<td>8.50</td>
</tr>
<tr>
<td>Allegany</td>
<td>8.50</td>
<td>*Bronx see New York City</td>
<td></td>
</tr>
<tr>
<td>*Brooklyn see New York City</td>
<td></td>
<td>Broome</td>
<td>8.00</td>
</tr>
<tr>
<td>*Nassau</td>
<td>0.62</td>
<td>*New York (Manhattan) see New York City</td>
<td></td>
</tr>
<tr>
<td>*New York City</td>
<td>8.38</td>
<td>Niagara</td>
<td>8.00</td>
</tr>
</tbody>
</table>

<table>
  <caption>RAND New York Sales Tax Rates reports sales tax rates for some counties & cities.</caption>
  <tr>
    <th>Area</th>
    <th>Rate</th>
    <th>Area</th>
    <th>Rate</th>
  </tr>
  <tr>
    <td>New York State-- only</td>
    <td>4.00</td>
    <td>Albany</td>
    <td>8.50</td>
  </tr>
  <tr>
    <td>Allegany</td>
    <td>8.50</td>
    <td>*Bronx see New York City</td>
    <td></td>
  </tr>
  <tr>
    <td>*Brooklyn see New York City</td>
    <td></td>
    <td>Broome</td>
    <td>8.00</td>
  </tr>
  <tr>
    <td>*Nassau</td>
    <td>0.62</td>
    <td>*New York (Manhattan) see New York City</td>
    <td></td>
  </tr>
  <tr>
    <td>*New York City</td>
    <td>8.38</td>
    <td>Niagara</td>
    <td>8.00</td>
  </tr>
</table>
<table>
<thead>
<tr>
<th>Location</th>
<th>Distance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Broome</td>
<td>8.00</td>
</tr>
<tr>
<td>Nassau</td>
<td>0.62</td>
</tr>
<tr>
<td>New York (Manhattan)</td>
<td></td>
</tr>
<tr>
<td>Niagara</td>
<td></td>
</tr>
<tr>
<td>New York City</td>
<td>8.38</td>
</tr>
<tr>
<td>Niagara</td>
<td>8.00</td>
</tr>
</tbody>
</table>

9. Write the style sheet that will arrange the following page: the sidebar should be on the right side of the page, the image, photo1, should float left in the paragraph, and the footer to clear (i.e. not overlap) with other parts of the page.

(Hint: Do not change any of the HTML code.)
<h1>Features</h1>

Theresia Walser, one of Germany’s most exciting young playwrights, will visit Lehman College Nov. 6 to discuss her recent work.

The CSS file:

```
#sidebar {
    width : 250px;
    float: right;
}
#photo1 {
    width: 100px;
    float: left;
}
#footer {
    clear: both;
}
```

10. Write a **complete** HTML file and **CSS file** to display information about your favorite foods. The page should have a header, with title, and a footer with your contact information, as well as a sidebar with a short description of where you can find such foods (either a link to a restaurant or a recipe). The description of each food should include a title, a link, and a paragraph describing the food. They should occur one after the other in the page (i.e. “flow”) and each have a different background color. The sidebar should appear to the right of the food descriptions, and the footer should be at the bottom of the page, not overlapping any other section (i.e. it should “clear” all other sections).
Recipes for both of these can be found in books on Italian and Spanish cooking at <a href="http://amazon.com">Amazon</a>.

Pesto is made from fresh basil, garlic, olive oil, and salt.

An ice cream, Dulce de Leche, is made from milk and sugar and has a smooth caramel taste.
